Retraction at the author's request:

https://doi.org/10.22055/jacm.2025.48691.5429

The authors have requested the retraction of this article following a change in their institutional requirements regarding the recognition of the publication for internal evaluation purposes. The retraction is made at the authors' request and is unrelated to the scientific validity, academic content, ethical conduct, or integrity of the research. No concerns regarding the data, methodology, findings, or conclusions of the article have been identified. In accordance with standard scholarly publishing practice, the original article and its DOI will remain accessible as part of the permanent scholarly record, with this retraction notice clearly linked to the article.
